

```
C:\Windows\System32\cmd. X Windows PowerShell X + v - □ X
Successfully installed asgiref-3.9.0 django-5.2.4 sqlparse-0.5.3 tzdata-2025.2

(env) C:\sample\digitalcaferoot>django-admin

Type 'django-admin help <subcommand>' for help on a specific subcommand.

Available subcommands:

[django]
  check
  compilemessages
  createcachetable
  dbshell
  diffsettings
  dumpdata
  flush
  inspectdb
  loaddata
  makemessages
  makemigrations
  migrate
  optimizemigration
  runserver
  sendtestemail
  shell
  showmigrations
  sqlflush
  sqlmigrate
  sqlsequencereset
  squashmigrations
  startapp
  startproject
  test
  testserver

Note that only Django core commands are listed as settings are not properly configured (error: Requested setting INSTALLED_APPS, but settings are not configured. You must either define the environment variable DJANGO_SETTINGS_MODULE or call settings.configure() before accessing settings. ).

(env) C:\sample\digitalcaferoot>
```

The install worked successfully! Congratulations!
